WORK EXPERIENCE

Role – Stream Trainee , Intelligentbots.

October-2022 To December - 2022

Gwalior

Key Responsibilities:- Intelligentbots is a leading innovator in the field of robotics, specializing in developing cutting-edge robotic solutions for various industries including manufacturing, healthcare, and logistics. Our mission is to push the boundaries of robotics technology and empower businesses with automation solutions that enhance efficiency, productivity, and safety.

Position Overview:- We are seeking a motivated and curious Robotics Stream Trainee to join our team for a duration: 2-months internship program. This internship offers an exciting opportunity to gain hands-on experience in robotics engineering, programming, and application development, working alongside experienced professionals in the field.

FIELD OF INTEREST

- Web Development.

Gwalior Basket

- **Description :** From fresh produce to pantry staples, we offer a diverse range of products to meet all your grocery needs. Our carefully curated selection ensures that you find everything you need in one place.

E-LEARNING

- **Description :** The eLearning website project will offer a user-friendly platform for learners to access a variety of educational courses. Key features include registration, course catalog, enrollment, interactive learning materials, and mobile-friendly design. The goal is to provide a flexible and engaging online learning experience for users of all levels.

Birthday Card

- **Description :** our birthday card project aims to create cards that make people happy on their special day. We put a lot of thought into the design, the messages inside, and making sure they're made with good materials. Our goal is to make birthdays extra special with cards that are full of love and joy.

GUESSING NUMBER

- **Description :** The "Guess the Number" project is a JavaScript game where the user attempts to guess a randomly generated number within a specified range. The project involves creating game logic, user interface, and features like input validation and feedback messages.

BACKGROUND CHANGER

- **Description :** Implement a React component named background color changer. It manages the state of the background color using useState Render color-changing buttons within the component, each triggering a state update upon click. Apply the selected color as the background color of a designated section within the component.
